

Senior Project: Status Report

Moodle Grading App

Developers: Emily Costa & Michael Sisko

Advisor: Victor Norman

Background & Problem

- Moodle's UI is not efficient
- Grading is time consuming and redundant
- Two options: edit in web browser or download CSV file

Our Solution

- Angular web application
- Custom feedback
- Globally reflected changes
- Display grade statistics

Assignment: Max Points:

Previous Student Next Student Import table Export Table Stats

Student Name: Save

Feedback: ☐ No Submission

☒ Nice Job!

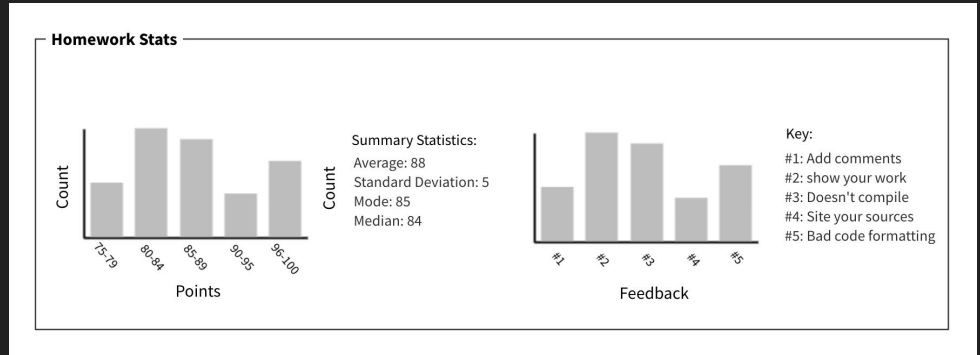

Add Option

No.	Name	Email	Grade	Feedback
<Table of Students>				

Statistics

Feedback: Frequency:

Return to Main

Live Demo...

Developing Tools

- Angular
- Bootstrap
- Apex Charts
- Cypress

Left to do...

- Adding/changing the scores and feedback
- Exporting the service into a CSV file
- Homework statistics and charts
